

Edison Electric Institute Conference

November 2020

Cautionary Statements And Risk Factors That May Affect Future Results

These presentations include forward-looking statements within the meaning of the federal securities laws. Actual results could differ materially from such forward-looking statements. The factors that could cause actual results to differ are discussed in the Appendix herein and in NextEra Energy's and NextEra Energy Partners' SEC filings.

Non-GAAP Financial Information

These presentations refer to certain financial measures that were not prepared in accordance with U.S. generally accepted accounting principles. Reconciliations of those non-GAAP financial measures to the most directly comparable GAAP financial measures can be found in the Appendix herein.

Other

See Appendix for definition of Adjusted Earnings, Adjusted EBITDA, CAFD expectations, and Adjusted Earnings by Source.

NextEra Energy is comprised of strong businesses supported by a common platform

- ~\$143 B market capitalization⁽¹⁾
- ~55 GW in operation⁽²⁾
- ~\$126 B in total assets⁽³⁾

- The largest electric utility in the United States by retail MWh sales

Gulf Power®

- Provides electric service to over 470,000 customers in northwest Florida

- The world leader in electricity generated from the wind and sun

Engineering & Construction

Supply Chain

Wind, Solar, and Fossil Generation

Nuclear Generation

3) As of September 30, 2020

NextEra Energy's strategic focus remains unchanged

NextEra Energy Strategic Focus

- **FPL and Gulf Power remain focused on delivering outstanding customer value**
 - Value of FPL's smart capital investments has never been more clear
 - Ongoing capital investment program at both companies remains on track
- **Energy Resources continues to capitalize on the outstanding renewables development environment**
 - ~4,800 MW added to backlog year-to-date⁽¹⁾
 - Expect all of our 2020 wind and solar projects will achieve their in-service dates this year
- **NextEra Energy's balance sheet strength and access to capital remain a core strategic focus**
 - \$4.5 billion in equity units and ~\$7 B⁽²⁾ in longer-term financings issued year-to-date
 - Maintain net liquidity position of ~\$14 B⁽³⁾

NextEra Energy is resilient and very well-positioned to deliver for customers and shareholders regardless of economic or market conditions

1) As of October 21, 2020
2) As of October 31, 2020
3) As of September 30, 2020

We have a long-term track record of delivering value to shareholders

----	----------	----------------

Our core strategy has focused on the importance of ESG impacts for more than 25 years

- Vision to be largest, most profitable clean energy provider in the world
- Vision informed by our values:
 - We are committed to excellence
 - We do the right thing
 - We treat people with respect

- Aim to be the most reliable and best operating utilities in the country

Gulf Power®

- Keep costs low
- Rapidly grow clean energy

- Build a diversified clean energy company
- Grow the world's leading wind, solar and storage portfolio

Deliver outstanding value for our customers

Support our communities and empower our teams

Do good for the environment

Generate significant shareholder value

Our strategy has generated real value for all stakeholders

ESG Highlights⁽¹⁾

Environment	Customers
<ul style="list-style-type: none">• 47% better CO₂ emissions rate than industry average• World's leading wind, solar, and battery storage portfolio• 97% of power generated from clean or renewable resources• 98% of water returned to original source	<ul style="list-style-type: none">• 30% lower bills than the national average• 63% better operating costs than industry average• >\$10.5 B in fuel cost savings to customers since 2001• 62% better service reliability than national average
Employees	Communities
<ul style="list-style-type: none">• 72% improvement in safety performance since 2003• 800,000 hours of employee training in 2019• Creation of racial equity working team• Top quartile engagement score in 2020	<ul style="list-style-type: none">• \$90 B capital invested from 2010 – 2019• \$1.6 B state and local taxes paid in 2019• >\$18 MM charitable giving in 2019• 89,000 employee volunteer hours in 2019

We are passionate about generating clean, renewable energy, while protecting the environment and giving back to the community

We are well positioned to continue our track record of growth

Expect
~\$60 B
of capital
deployment
from 2019
through 2022

We believe we have the industry's leading growth prospects

We expect the industry's disruptive factors will further expand and accelerate over the coming years

Disruptive Industry Changes Today

Potential Cost per MWh Post-2023/2024⁽¹⁾ (\$ / MWh)

U.S. Electricity Production by Fuel Type⁽²⁾

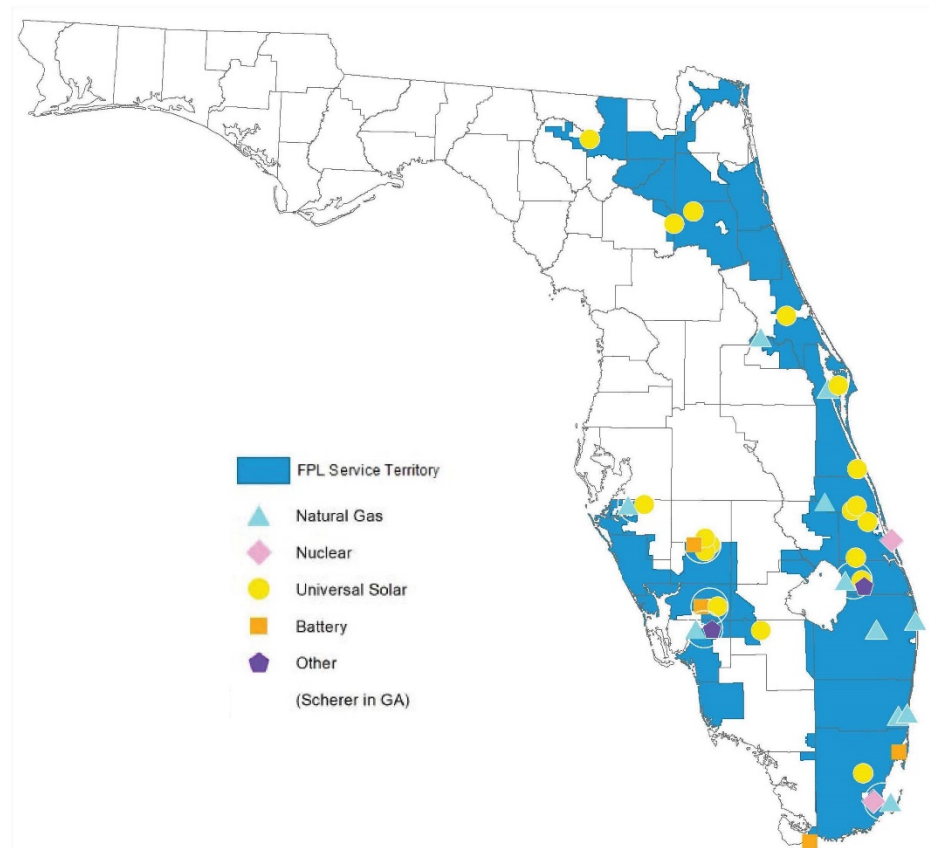

1) Represents projected cost per MWh for new build wind, solar, and natural gas; excludes PTC for wind and assumes 10% ITC for solar; projected per MWh operating cost including fuel for existing nuclear and coal; based on NextEra Energy internal estimates

10 2) 2019 source: U.S. EIA; 2030 estimate source: National Renewable Energy Laboratory (NREL)

Florida Power & Light is recognized as one of the best utility franchises in the U.S.

Florida Power & Light Company

- One of the largest electric utilities in the U.S.
- Vertically integrated, retail rate-regulated
- 5+ MM customer accounts
- ~28 GW in operation
- ~\$12 B in operating revenues
- ~\$61 B in total assets

FPL has significant investment opportunities across its system that are expected to generate customer savings and further enhance reliability

FPL 2019 – 2022 Capital Expenditures

Opportunity	Status	Projected Investment ⁽¹⁾	Recovery Mechanism
Dania Beach Clean Energy Center	Expected COD in 2022	~\$900 MM ⁽²⁾	Base rates
2020 SoBRA	Completed 2Q 2020	~\$390 MM	Solar Base Rate Adjustment
SolarTogether	First 6 projects complete, remaining 14 expected COD in 2020 & 2021	~\$1.8 B	Base rates w/ participant contributions as offset ⁽³⁾
Additional solar investments	Site control; early stage development	~\$1.0 - \$1.5 B	Base rates
Battery storage	Various battery storage projects	~\$420 MM	Base rates
500 kV transmission project ⁽⁴⁾	Ongoing	~\$1.0 - \$1.5 B	Base rates
Transmission & distribution storm hardening	Investments from 2019 – 2022	~\$3.0 - \$4.0 B	Storm protection plan cost recovery clause / base rates ⁽⁵⁾
All other transmission & distribution	Investments from 2019 – 2022	~\$7.0 - \$8.0 B	Base rates
Maintenance of existing assets, nuclear fuel, and other	Ongoing	~\$5.5 - \$6.5 B	Base rates

Total projected capital deployment of \$23 B to \$25 B from 2019 through 2022

1) Includes amount invested in 2019 through 2022, unless otherwise noted

2) Reflects total investment for Dania Beach Clean Energy Center including investment made pre-2019

3) Proposed tariff subject to approval by the Florida Public Service Commission

4) Replacement of 500 kV foundations and structures across the service territory

5) Regulations regarding storm protection plan cost recovery clause, including recoverable investments

Growth in regulatory capital employed is expected to drive FPL's net income growth through 2022

FPL Regulatory Capital Employed⁽¹⁾

2019-2022 Capital Expenditures

FPL expects regulatory capital employed to grow at a CAGR of roughly 9% from 2018 through 2022

At FPL, we will continue to focus on the long-term strategy that has delivered our best-in-class customer value proposition

FPL Customer Value Focus

Operational Cost Effectiveness⁽¹⁾

\$/Retail MWh

Service Reliability⁽²⁾

minutes

1000-kWh Residential Bill⁽³⁾

CO₂ Emissions Rate

CO₂ Lbs./MWh

1) FERC Form 1, non-fuel O&M; excludes pensions and other employee benefits

2) System Average Interruption Duration Index

3) Based on a typical 1,000 kWh residential bill

4) Expressed in real 2018 dollars and nominal 2021 dollars, respectively

FPL and Gulf Power have an unwavering commitment to the communities we serve

The acquisition of Gulf Power expanded NextEra Energy's Florida footprint and regulated operations

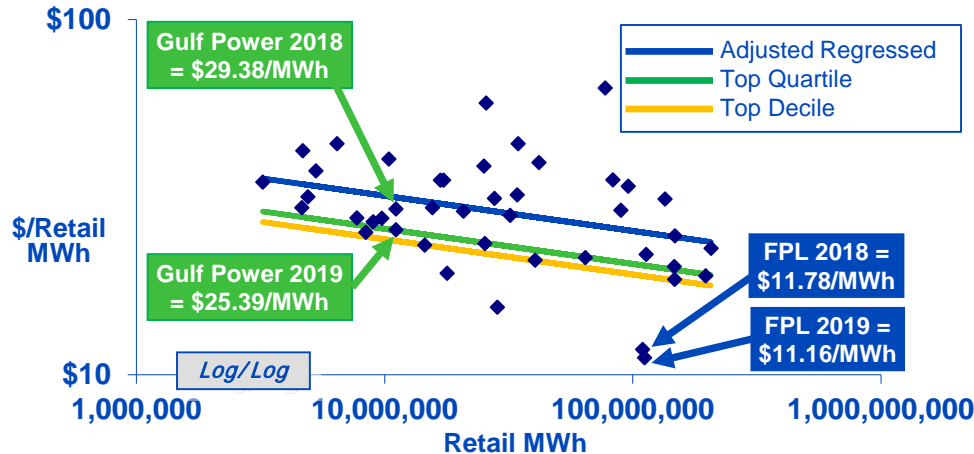

Gulf Power

- Acquisition closed 1/1/2019
- Located in Northwest Florida
- Over 470,000 customers
- ~2,400 MW of generation in operation
 - ~1,600 MW coal
 - ~700 MW natural gas
 - ~75 MW solar
- \$1.5 B in operating revenues
- \$6.7 B total assets

Significant opportunities exist to improve the Gulf Power customer value proposition

2019 Operational Cost Effectiveness⁽¹⁾

1,000-kWh Residential Bill⁽²⁾

Good
↓

2019 Generation Mix Comparison⁽³⁾

2019 CO₂ Emissions Rate⁽⁴⁾

1) Source: FERC Form 1. Total Non-Fuel O&M excludes injuries and damages, pensions and benefits and other power supply expenses. For FPL only, one-time storm costs are excluded; Peer Group includes holding companies with over 10% generation MWh's and over 100,000 customers; Retail MWh's only includes Residential, Commercial, Industrial, FERC Form 1 Accts: 440 & 442

2) Based on a typical 1,000 kWh monthly residential bill for July 2020; FL IOUs Average consists of data from FPL, TECO, Duke Energy Florida, FPUC and Gulf Power; as of July 2020; National Average Source: EEI; as of July 2019 based on reporting utilities; excludes Gulf Power \$8 per month surcharge related to Hurricane Michael

3) As of December 31, 2019

4) Industry average from the Department of Energy's Energy Information Administration

Despite growing regulatory capital employed at roughly half the rate of FPL over the past 10 years, Gulf Power's bill has increased significantly while FPL's has declined

2008 vs. 2018 Historical Comparison

Regulatory Capital Employed⁽¹⁾

1,000-kWh Residential Bill⁽²⁾

1) 13-month average; includes retail rate base, wholesale rate base, clause-related investments and AFUDC projects; excludes accumulated deferred income taxes

2) Based on a typical 1,000 kWh monthly residential bill and internal calculations

We have identified several opportunities to improve the customer value proposition through smart capital investments

Gulf Power 2019 – 2022 Capital Initiatives

Opportunity	Status	Projected Investment ⁽¹⁾	Recovery Mechanism
North Florida Resiliency Connection	Development in process; target in-service 2022	~\$550 MM	Base rates
Plant Crist conversion to natural gas and gas lateral	Development in process; target in-service 2020	~\$150 - \$175 MM	Base rates
New Plant Crist combustion turbines	Projected for 2021 COD	~\$400 - \$500 MM	Base rates
Plant Smith combustion turbine upgrades	2019 completion	~\$50 MM	Base rates
2020/2021 solar investments	Three sites projected for 2020/2021 COD	~\$300 MM	Base rates
Customer systems	2020 completion	~\$100 MM	Base rates
Transmission & distribution storm hardening	Investments from 2019 – 2022	~\$100 - \$200 MM	Storm protection plan cost recovery clause / base rates ⁽²⁾
All other transmission & distribution	Investments from 2019 – 2022	~\$650 - \$800 MM	Base rates
Environmental clause investments	Ongoing	~\$200 MM	Environmental cost recovery clause
Maintenance of existing assets and other	Ongoing	~\$400 - \$600 MM	Base rates

Total projected capital deployment of \$2.9 B to \$3.3 B from 2019 through 2022

1) Projected investment includes AFUDC

2) Regulations regarding storm protection plan cost recovery clause, including recoverable investments, not yet finalized

In the first year of ownership, NextEra Energy successfully executed on its strategy at Gulf Power

Gulf Power 2019 Execution Summary

Operational Cost Effectiveness⁽¹⁾

\$/Retail MWh

Regulatory Capital Employed⁽²⁾

1) GAAP O&M per retail MWh

2) 13-month average; includes retail rate base, wholesale rate base, clause-related investments and AFUDC projects; excludes accumulated deferred income taxes

Execution of our plans at Gulf Power generated significant value creation for our customers and our shareholders in 2019

Gulf Power 2019 Execution Summary

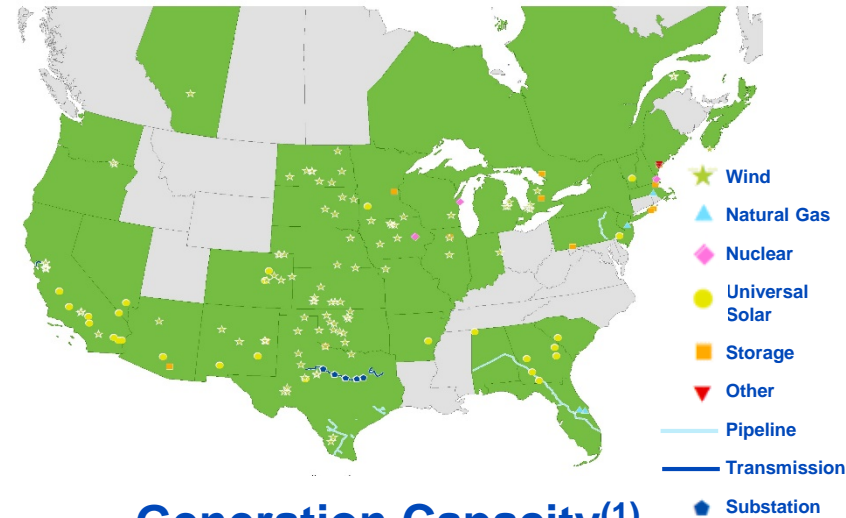

Energy Resources is the leading North American clean energy company

Energy Resources

- **World leader in electricity generated from the wind and sun**
- **~24 GW⁽¹⁾ of generation in operation**
 - ~16 GW wind
 - ~3 GW solar
 - ~3 GW nuclear
 - ~2 GW natural gas/oil
- **~13 GW wind and solar in backlog⁽²⁾**
- **~2.5 GW battery storage, including backlog**
- **~6 Bcf of natural gas pipeline capacity operating or under development⁽³⁾**
- **~\$1.7 B⁽⁴⁾ in adjusted earnings**
- **~\$55 B in total assets**

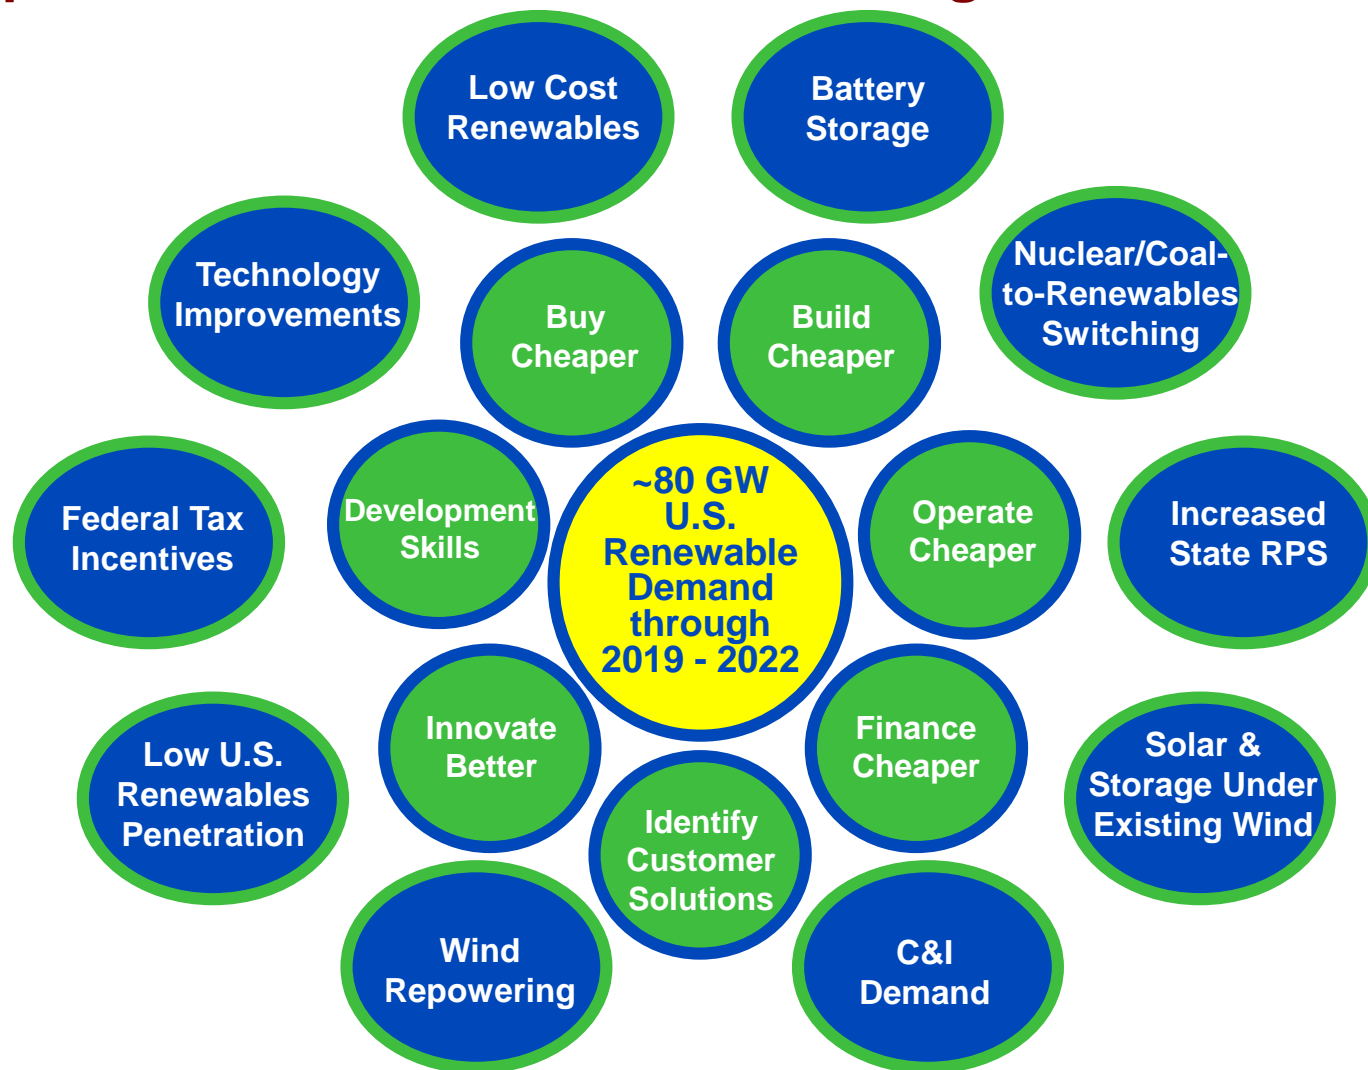

- 1) MW capacity owned and/or operated by Energy Resources; adjusted to reflect retirement of Duane Arnold nuclear plant
 - 2) Includes signed contracts as of October 21, 2020; excludes battery storage
 - 3) Includes ~4.3 Bcf Texas Pipelines operated by Energy Resources for NextEra Energy Partners; reflects net Bcf for pipelines where Energy Resources and NextEra Energy Partners' ownership stake is less than 100%
 - 4) Full-year 2019
- Note: All other data as of September 30, 2020

Generation Capacity⁽¹⁾

We believe Energy Resources' renewables development opportunities have never been stronger

Energy Resources is well positioned to benefit as the US pursues electrification to deliver economic carbon reductions

Energy Resources' competitive advantages position us to continue to capitalize on what we believe is the best renewables development environment in our history

Energy Resources Development Program⁽¹⁾ (Signed Contracts as of October 21, 2020)

	2019 – 2020 Signed Contracts	2019 – 2020 Current Expectations	2021 – 2022 Signed Contracts	2021 – 2022 Current Expectations	2019 – 2022 Current Expectations
Wind	3,806	3,000 – 4,000+	2,362	2,000 – 3,800	5,000 – 7,800
Solar	1,495	1,000 – 2,500	3,692	2,800 – 4,800	3,800 – 7,300
Energy Storage	22	50 – 150	1,275	650 – 1,250+	700 – 1,400
Wind Repowering	2,647	>2,000	66	200 – 700	2,800 – 3,300
Total⁽²⁾	7,970	6,050 – 8,650	7,395	5,650 – 10,550	15,500 – 19,800
Build-Own-Transfer ⁽²⁾	674		110		

Our ~15,000 MW renewables backlog is larger than Energy Resources' existing renewables portfolio⁽³⁾

1) MW capacity expected to be owned and/or operated by Energy Resources; includes build-own-transfer projects with long-term O&M agreements

2) Total excludes 429 MW of wind, 2,626 MW of solar, 1,026 MW of storage for post-2022 delivery; build-own-transfer excludes 380 MW build-own-transfer signed for post-2022 delivery

24 3) Excluding Energy Resources' share of NEP assets

The economics of renewables continue to rapidly expand the opportunity set

MW Originated Per Four-Year Period

Energy Resources is well positioned to take advantage of the accelerating disruption within the energy sector

Technology improvements and capital cost declines have significantly improved wind and solar economics

Wind & Solar Technology

Levelized Cost of Electricity from Wind
(Including Production Tax Credits)

Levelized Cost of Electricity from Solar
(Including Investment Tax Credits)

1) Source: U.S. Department of Energy, Wind Technologies Market Report

2) Source: Bloomberg New Energy Finance

3) Source: IHS Markit. The use of this content was authorized in advance. Any further use or redistribution of this content is strictly prohibited without written permission by IHS Markit. All rights reserved

26 4) Energy Resources' estimate

Wind is expected to be the cheapest source of electric generation even after production tax credits phase down

Expected Drivers of Future Wind Levelized Cost of Energy (LCOE) Reductions

- **Increased generation as a result of larger turbines**
 - Viability of larger post-2024 rotor diameters confirmed by OEMs
 - Influence technology design and be early adopters
- **Capital cost savings**
 - Larger turbine size results in fewer turbines and lower balance of system (BoS) costs
 - Benefits from manufacturing scale
 - Additional BoS cost saving initiatives
- **Continued O&M cost reductions**
 - Advanced analytics expected to drive meaningful cost reductions
- **Financing efficiencies**
 - No need for more expensive tax equity when tax credits phase down

Unsubsidized Wind LCOE Roadmap⁽¹⁾

Increased manufacturing capacity has resulted in energy storage cost declines and the ability to create low-cost near-firm wind and solar

Energy Storage Costs

Battery Pack Cost Relative to Capacity⁽¹⁾

4-Hour Battery Storage Adder⁽²⁾

1) Source: Bloomberg New Energy Finance

2) Energy Resources' estimate; assumes: 4-hour battery storage at 25% of nameplate solar capacity; total battery system costs calculated as two times Bloomberg New Energy Finance battery pack cost

Solar is expected to be the cheapest source of electric generation other than wind after investment tax credit steps down

Expected Drivers of Future Solar Levelized Cost of Energy (LCOE) Reductions

- Continued module cost declines
- Continued balance of system (BoS) savings from improved technology and engineering innovation
 - ~30% decline expected by 2022
- Drivers
 - Innovative racking systems and installation methods
 - Design optimization
 - Increased module power rating reduces BoS costs for associated site prep, racking and cabling
- Continued O&M cost reductions
 - Goal of operating almost all solar fleet remotely
- Financing efficiencies
 - No need for more expensive tax equity when ITC phases down

Continued declines in battery costs are expected to result in the ability to generate near-firm wind and solar at low costs even after tax credits phase down

Expected Drivers of Future Energy Storage Cost Reductions

- **Continued battery pack cost declines and efficiency improvements**
 - Automotive investment will continue to drive innovation and reduce costs
- **Continued balance of system (BoS) savings from improved technology and engineering innovation**
 - Innovations on enclosures, DC-DC converters, and integration with solar equipment
- **Improved financing efficiencies**

Low cost, near-firm renewables are expected to create significant long-term demand

Wind & Solar Market Potential⁽¹⁾

Average Annual Wind Additions

Market Growing
~15%
annually on average

Average Annual Solar Additions

We now have more than \$2 B of safe harbor wind and solar equipment, which could support as much as \$40 B of renewables from 2021 - 2024

1) 2019 - 2022 source: average of National Renewable Energy Laboratory (NREL), MAKE, Bloomberg New Energy Finance, IHS Markit and U.S. Energy Information Administration capacity addition estimates; 2023 - 2030 source: NREL capacity addition estimates

Blending of Hydrogen in Natural Gas Boilers

Hydrogen provides a pathway to achieving a zero-carbon future in power as well as through the electrification of transportation and industrial sectors

Hydrogen Opportunity⁽¹⁾

- NextEra Energy is an early mover in green hydrogen
- With cost improvements, green hydrogen supports zero carbon future
 - Opens new potential investment opportunities to support transportation and industrial sectors
- Hydrogen is a potential enabler for NextEra Energy to deploy more renewables projects

A zero carbon future creates significant future growth opportunities on which NextEra Energy is uniquely well-positioned to capitalize

We recently increased the range of our financial expectations and extended our long-term growth outlook

NextEra Energy's Adjusted Earnings Per Share Expectations

--- Expected accretion from FL acquisitions⁽²⁾

- Adjusted EPS ranges updated to reflect 4-for-1 stock split⁽³⁾
- Increased adjusted earnings expectations for 2021
 - \$0.05 increase, post-split
- Extended 6% to 8% growth range from 2022 through 2023 off increased 2021 base
- Continue to expect ~10% annual DPS growth through at least 2022⁽⁴⁾

Will be disappointed if we are not able to deliver financial results at or near the top end of our adjusted EPS expectations ranges through 2023

1) 2018 retrospectively adjusted to reflect 4:1 split completed in October 2020

2) Includes Gulf Power, Florida City Gas, and the Stanton and Oleander natural gas power plants

3) 4:1 stock split completed in October 2020

4) Off a 2020 base; dividend declarations are subject to the discretion of the Board of Directors of NextEra Energy

NextEra Energy Partners is a best-in-class clean energy company

NextEra Energy Partners' Portfolio⁽¹⁾

- **Stable cash flows supported by:**
 - Long-term contracts with credit-worthy counterparties
 - Geographic and asset diversity
- **~5,330 MW of renewables**
 - ~4,575 MW wind
 - ~750 MW solar
- **~4.3⁽²⁾ Bcf total natural gas pipeline capacity**
 - Eight natural gas pipelines
 - ~727 miles
 - ~3.5⁽²⁾ Bcf of contracted capacity

Solid distribution growth through accretive acquisitions

1) Current portfolio as of September 30, 2020

2) Reflects net Bcf for pipelines where NextEra Energy Partners' ownership stake is less than 100%

6) As of December 31, 2019; should not be construed as tax advice

NEP continues to focus on investing in long-term contracted clean energy assets with strong creditworthy counterparties and attractive cash flows

Growth Strategy

Renewables are expected to be the primary driver of NEP's growth

Acquisitions from Energy Resources provide clear visibility to continued growth at NEP

Energy Resources' Renewable Portfolio Since NEP's IPO⁽¹⁾

Energy Resources' portfolio alone provides one potential path to 12% - 15% growth per year through 2024

- 1) Current portfolio as of September 30, 2020
- 2) Includes renewables backlog of 15 GW less 0.8 GW of repowering backlog
- 3) Assuming top end of remaining 2019 – 2022 renewables development expectations

NEP is well positioned to benefit from the significant wind and solar growth that is expected over the coming years

NEP & Long-Term Renewables Demand

U.S. Renewable Energy Capacity through 2030

U.S. Renewables Penetration

NEP is well positioned to capture a meaningful share of future renewables growth

- 1) Current portfolio as of September 30, 2020
- 2) Includes renewables backlog of 15 GW less 0.8 GW of repowering backlog plus top end of remaining 2019 – 2022 development expectations
- 3) Source: IHS Markit
- 4) Source: Additional installed capacity from National Renewable Energy Laboratory (NREL)

NEP announced the acquisition of interests in a ~1,100-MW portfolio of renewables projects and a new convertible equity portfolio financing

Transaction Summary

- **NEP is acquiring a 40% interest in ~1,000-MW renewables portfolio and 100% interest in 100-MW solar-plus-storage project**
 - ~19 year remaining contract life and average customer credit rating of A- / A3⁽¹⁾
- **As part of the transaction, NEP entered into a 10-year, ~\$1.1 B convertible equity portfolio financing**
 - Includes acquired assets plus four existing NEP wind and solar projects
 - ~\$750 MM initial draw in 2020 to finance acquisition and pay down revolving credit facility
 - ~\$350 MM 2nd draw expected in 2021
- **By including private investors in the transaction, NEP significantly strengthens its balance sheet and expects to have access to up to ~\$2.4 B to support long-term growth**

NEP announced the acquisition of interests in a ~1,100-MW portfolio of renewables projects and a new convertible equity portfolio financing

Transaction Summary (continued)

- **As a result of the transaction, increased year-end 2020 run rate Adjusted EBITDA expectations range to \$1.300 B – \$1.480 B**
- **Introduced 12/31/21 run rate expectations for Adjusted EBITDA of \$1.440 B – \$1.620 B and CAFD of \$600 MM – \$680 MM**
 - Reflects 10% and 7% growth from the comparable year-end 2020 ranges at the midpoints, respectively
- **Expects to achieve 2020 and 2021 distribution growth objectives while maintaining a trailing 12-month payout ratio of ~70% and ~80%, respectively**

The transaction leaves NEP uniquely positioned to take advantage of the disruptive factors reshaping the energy industry

NEP agreed to purchase interests in a ~1,100-MW portfolio of long-term contracted renewables projects from Energy Resources for ~\$320 MM⁽¹⁾

NEP Portfolio Additions⁽²⁾

Project	Technology	MW ⁽³⁾	COD	Remaining PPA Years
Blue Summit III	Wind	200	2019	14
Taylor Creek	Solar	75	2020	20
Harmony	Solar	75	2020	20
Sanford	Solar	49	2020	20
Ponderosa	Wind	200	2020	15 20
Soldier Creek	Wind	301	2020	20
Saint	Solar	100	2020	25
Wilmot	Solar-plus-Storage	100	2021	20
Total		1,100		19

Acquisition is expected to close this year, contributing \$75-85 MM of Adjusted EBITDA and \$24-\$29 MM of CAFD on a run-rate basis⁽⁴⁾

1) Net of ~\$55 MM in expected tax equity proceeds, subject to working capital and other adjustments

2) NEP is purchasing 100% interest in Wilmot; 40% interest in other projects

3) Represents 100% of project size

4) On a five-year average annual run-rate basis, beginning Dec. 31, 2020

The financing is the longest-dated and lowest-cost convertible equity portfolio financing to date

Enhanced 10-Year CEPF Structure

Commitment Size	~\$1.1 B	➔	Largest CEPF equity partnership yet
Draw Timing	Can occur over multiple years and in partial amounts	➔	Enhances flexibility and provides liquidity
Pre-Flip Annual “Coupon”	~4.4% over 10 years ⁽¹⁾	➔	Low pre-flip coupon for longer
Pre-Tax Buyout IRR	~6.75% unlevered return	➔	Lowest cost yet
Buyout Right Timing	Periodically, and for partial interests between years 6 and 10	➔	Longest duration; buyouts after existing CEPFs
Buyout Right Payment	100% in NEP units at no discount	➔	Zero debt imputation

KKR has also entered into a letter of intent to fund an additional ~\$900 million CEPF on similar terms and conditions to support future growth⁽²⁾

1) Portfolio cash is allocated 75% to NEP and 25% to investors following 2nd draw (83% to NEP and 17% to investors following first draw)

2) Non-binding letter of intent; subject to identifying projects(s) that are mutually acceptable and other conditions

This transaction significantly strengthens NEP's balance sheet and further enhances its post-transaction potential financing capacity up to ~\$2.4 B

Transaction Benefits

NEP Financing Capacity⁽¹⁾

(\$MM)

- Post-transaction, NEP expected to have ~\$1.15 B of capacity under its revolving credit facility
- Additional CEPF transactions of \$1.25 B, provide flexibility to fund future growth
 - ~\$350 MM 2nd draw against the 2020 portfolio
 - ~\$900 MM potential future CEPF⁽²⁾
- NEP's year-end 2020 debt-to-EBITDA metrics expected to be <4.0x at S&P and Moody's

The significant access to capital gives NEP the greatest financing flexibility in its history

1) Excludes actual and projected cash balances

46 2) Non-binding letter of intent; subject to identifying projects(s) that are mutually acceptable and other conditions

CEPFs provide a significant amount of flexibility in managing the buyout which retains option value for NEP unitholders

CEPF Financing Flexibility – Potential Options

ENERGY

We believe that no company in any industry has done more to reduce carbon emissions and to confront climate change

Clean Energy Business

Percentage of Adjusted Earnings by Source⁽¹⁾

67% of Adjusted Earnings from generation is from zero-carbon sources

26% of Adjusted Earnings from renewables

T&D investment supports clean energy deployment

NextEra Energy is a world leader in clean energy infrastructure

We have one of the lowest emissions profiles of any utility in North America

Reducing Our Carbon Emissions⁽¹⁾

Average CO₂ Emissions Rate: NEE vs. U.S. Electric Power Sector

52% reduction in CO₂ emissions rate⁽²⁾

20% reduction in absolute CO₂ tons emitted⁽²⁾

68% increase in clean electricity generation⁽²⁾

We have established a target to reduce our CO₂ emissions rate by 67% by 2025, off a 2005 base

1) Sources: NEE: historic internal; U.S. Electric Power Sector: DOE data

2) As of year-end 2019 since 2005

In 2001, FPL began the modernization of its generation fleet, which is now one of the cleanest and most efficient in the country

FPL Clean Energy Generation

- **Executing one of the world's largest solar expansions**
 - FPL 30x30 plan to install 30 million solar panels in Florida by 2030
 - Solar Together – largest community solar program in U.S.
- **Plans to retire last coal unit on FPL's current system announced in June 2020**
 - Will complete closure of ~2,700 MW of coal capacity since 2015
- **70% increase in zero emissions energy expected by 2029**

We project a more than 30% decrease in the CO₂ emissions rate for the combined FPL/Gulf Power system from 2019 to 2029⁽²⁾

1) FPL combined with Gulf Power projected from 2020 TYSP

2) Based on internal projections from 2020 TYSP off a combined 2019 FPL and Gulf Power emissions rate

Energy Resources' renewable backlog is now larger than the operating wind and solar portfolios of all but two other companies in the world

Energy Resources Renewable Portfolio⁽¹⁾ (GW)

Energy Resources' operating portfolio resulted in over 28 MM tons of avoided CO₂ emissions in the U.S. in 2019

1) Operating portfolio as of 9/30/2020; Backlog as of 10/21/2020; All other companies as of 12/31/2019

2) MW capacity owned and/or operated by Energy Resources

Our approach to sustainability engages all levels of the company from the board of directors to our employees

Sustainability Governance

Board of Directors and Board Committees

- Oversight of the execution of our strategy including issues which could impact the long-term sustainability of our company
- Annual in-depth strategy sessions
- Regular updates on each business' opportunities and risks, including those related to ESG issues

Chief Executive Officer

- Ultimate responsibility for the company's sustainability performance and long-term success

Executive Leadership

- Achieving specific goals tied to sustainability to deliver long-term value

Sustainability Executive Steering Committee and Sustainability Council

- Composed of key business unit representatives, focuses on proactively addressing sustainability issues and policies and driving strategic initiatives across the company

Employees

- By delivering on their goals and objectives, our employees are key to driving our company's sustainability efforts and delivering value to all stakeholders

Our track record of delivering strong financial and operational performance begins with sound corporate governance and oversight

Governance Highlights

Board Composition⁽¹⁾

- 12 of 13 directors are independent
- Independent lead director
- Average director tenure of 9 years
- Since 2018, added two new independent directors, including a diverse director
- 38% of board is diverse/women

Governance Best Practices

- Special meeting threshold of 20%
- Adopted proxy access
- No super majority vote requirements
- Mandatory retirement age
- Overboarding policy
- Annual board and committee self-assessments

Risk Oversight

- Corporate risk management committee
- Risk assessment reported to audit committee and board annually
- Annual strategy sessions reviewed with board
- Corporate environmental governance council with quarterly due diligence reporting to board
- Preparedness and crisis planning

Compensation Best Practices

- Senior executive goals tied to sustainability since 2001
- Robust stock ownership requirements for executives and directors
- Clawback policy
- No hedging/pledging of company securities
- 90% of CEO's 2019 compensation opportunity is performance-based

NextEra Energy's credit metrics remain on track

4) Net of approximately \$0.02 income tax benefit at FPL in 2017

Definitional information

NextEra Energy, Inc. Adjusted Earnings Expectations

This presentation refers to adjusted earnings per share expectations. Adjusted earnings expectations exclude the cumulative effect of adopting new accounting standards, the effects of non-qualifying hedges and unrealized gains and losses on equity securities held in NextEra Energy Resources' nuclear decommissioning funds and OTTI, none of which can be determined at this time. Adjusted earnings expectations also exclude the effects of NextEra Energy Partners, LP net investment gains, gains on disposal of a business, differential membership interest-related, and acquisition-related expenses. In addition, adjusted earnings expectations assume, among other things: normal weather and operating conditions; continued recovery of the national and the Florida economy; supportive commodity markets; current forward curves; public policy support for wind and solar development and construction; market demand and transmission expansion to support wind and solar development; market demand for pipeline capacity; access to capital at reasonable cost and terms; no divestitures, other than to NextEra Energy Partners, LP, or acquisitions; no adverse litigation decisions; and no changes to governmental tax policy or incentives. Expected adjusted earnings amounts cannot be reconciled to expected net income because net income includes the effect of certain items which cannot be determined at this time.

NextEra Energy Resources, LLC. Adjusted EBITDA

Adjusted EBITDA includes NextEra Energy Resources consolidated investments, its share of NEP and forecasted investments, as well as its share of equity method investments. Adjusted EBITDA represents projected (a) revenue less (b) fuel expense, less (c) project operating expenses, less (d) corporate G&A, plus (e) other income, less (f) other deductions. Adjusted EBITDA excludes the impact of non-qualifying hedges, other than temporary impairments, certain differential membership costs, and net gains associated with NEP's deconsolidation beginning in 2018. Projected revenue as used in the calculations of Adjusted EBITDA represents the sum of projected (a) operating revenue plus a pre-tax allocation of (b) production tax credits, plus (c) investment tax credits and plus (d) earnings impact from convertible investment tax credits.

NextEra Energy Resources, LLC. Adjusted EBITDA by Asset Category

Adjusted EBITDA by Asset Category includes NextEra Energy Resources consolidated investments, its share of NEP and forecasted investments, as well as its share of equity method investments. Adjusted EBITDA by Asset Category represents projected (a) revenue less (b) fuel expense, less (c) project operating expenses, less (d) a portion of corporate G&A deemed to be associated with project operations, plus (e) other income, less (f) other deductions. Adjusted EBITDA by Asset Category excludes the impact of non-qualifying hedges, other than temporary impairments, corporate G&A not allocated to project operations, and certain differential membership costs. Projected revenue as used in the calculations of Adjusted EBITDA by Asset Category represents the sum of projected (a) operating revenue plus a pre-tax allocation of (b) production tax credits, plus (c) investment tax credits and plus (d) earnings impact from convertible investment tax credits.

NextEra Energy, Inc. Adjusted Earnings by Source

NextEra Energy's adjusted earnings by source includes its share of consolidated investments and forecasted investments through 2020, as well as its forecasted share of equity method investments, including NextEra Energy Partners, LP. Adjusted earnings by source for FPL and Gulf Power are calculated by allocating 2020 forecasted earnings based on the relative percentage of forecasted after-tax earnings on rate base by source using the 13-month average plant balances by FERC plant account. Adjusted earnings by source for NextEra Energy Resources represents project portfolio contributions, as well as allocations of G&A, interest, and income taxes. Interest expense includes an allocation from NextEra Energy Capital Holdings, Inc. based on projected invested capital using a debt to equity ratio of 70/30. See NextEra Energy, Inc. Adjusted Earnings Expectations definition.

Cautionary Statement And Risk Factors That May Affect Future Results

This presentation contains “forward-looking statements” within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not statements of historical facts, but instead represent the current expectations of NextEra Energy, Inc. (NextEra Energy) and Florida Power & Light Company (FPL) regarding future operating results and other future events, many of which, by their nature, are inherently uncertain and outside of NextEra Energy's and FPL's control. Forward-looking statements in this presentation include, among others, statements concerning adjusted earnings per share expectations and future operating performance, statements concerning future dividends, and results of acquisitions. In some cases, you can identify the forward-looking statements by words or phrases such as “will,” “may result,” “expect,” “anticipate,” “believe,” “intend,” “plan,” “seek,” “potential,” “projection,” “forecast,” “predict,” “goals,” “target,” “outlook,” “should,” “would” or similar words or expressions. You should not place undue reliance on these forward-looking statements, which are not a guarantee of future performance. The future results of NextEra Energy and FPL and their business and financial condition are subject to risks and uncertainties that could cause their actual results to differ materially from those expressed or implied in the forward-looking statements, or may require them to limit or eliminate certain operations. These risks and uncertainties include, but are not limited to, those discussed in this presentation and the following: effects of extensive regulation of NextEra Energy's and FPL's business operations; inability of NextEra Energy and FPL to recover in a timely manner any significant amount of costs, a return on certain assets or a reasonable return on invested capital through base rates, cost recovery clauses, other regulatory mechanisms or otherwise; impact of political, regulatory and economic factors on regulatory decisions important to NextEra Energy and FPL; disallowance of cost recovery by FPL based on a finding of imprudent use of derivative instruments; effect of any reductions or modifications to, or elimination of, governmental incentives or policies that support utility scale renewable energy projects of NextEra Energy Resources, LLC and its affiliated entities (NextEra Energy Resources) or the imposition of additional tax laws, policies or assessments on renewable energy; impact of new or revised laws, regulations, interpretations or ballot or regulatory initiatives on NextEra Energy and FPL; capital expenditures, increased operating costs and various liabilities attributable to environmental laws, regulations and other standards applicable to NextEra Energy and FPL; effects on NextEra Energy and FPL of federal or state laws or regulations mandating new or additional limits on the production of greenhouse gas emissions; exposure of NextEra Energy and FPL to significant and increasing compliance costs and substantial monetary penalties and other sanctions as a result of extensive federal regulation of their operations and businesses; effect on NextEra Energy and FPL of changes in tax laws, guidance or policies as well as in judgments and estimates used to determine tax-related asset and liability amounts; impact on NextEra Energy and FPL of adverse results of litigation; effect on NextEra Energy and FPL of failure to proceed with projects under development or inability to complete the construction of (or capital improvements to) electric generation, transmission and distribution facilities, gas infrastructure facilities or other facilities on schedule or within budget; impact on development and operating activities of NextEra Energy and FPL resulting from risks related to project siting, financing, construction, permitting, governmental approvals and the negotiation of project development agreements; risks involved in the operation and maintenance of electric generation, transmission and distribution facilities, gas infrastructure facilities, retail gas distribution system in Florida and other facilities; effect on NextEra Energy and FPL of a lack of growth or slower growth in the number of customers or in customer usage; impact on NextEra Energy and FPL of severe weather and other weather conditions; threats of terrorism and catastrophic events that could result from terrorism, cyberattacks or other attempts to disrupt NextEra Energy's and FPL's business or the businesses of third parties; inability to obtain adequate insurance coverage for protection of NextEra Energy and FPL against significant losses and risk that insurance coverage does not provide protection against all significant losses; a prolonged period of low gas and oil prices could impact NextEra Energy Resources' gas infrastructure business and cause NextEra Energy Resources to delay or cancel certain gas infrastructure projects and could result in certain projects becoming impaired; risk to NextEra Energy Resources of increased operating costs resulting from unfavorable supply costs necessary to provide NextEra Energy Resources' full energy and capacity requirement services; inability or failure by NextEra Energy Resources to manage properly or hedge effectively the commodity risk within its portfolio;

Cautionary Statement And Risk Factors That May Affect Future Results (cont.)

effect of reductions in the liquidity of energy markets on NextEra Energy's ability to manage operational risks; effectiveness of NextEra Energy's and FPL's risk management tools associated with their hedging and trading procedures to protect against significant losses, including the effect of unforeseen price variances from historical behavior; impact of unavailability or disruption of power transmission or commodity transportation facilities on sale and delivery of power or natural gas by NextEra Energy, including FPL; exposure of NextEra Energy and FPL to credit and performance risk from customers, hedging counterparties and vendors; failure of NextEra Energy or FPL counterparties to perform under derivative contracts or of requirement for NextEra Energy or FPL to post margin cash collateral under derivative contracts; failure or breach of NextEra Energy's or FPL's information technology systems; risks to NextEra Energy and FPL's retail businesses from compromise of sensitive customer data; losses from volatility in the market values of derivative instruments and limited liquidity in OTC markets; impact of negative publicity; inability of NextEra Energy and FPL to maintain, negotiate or renegotiate acceptable franchise agreements with municipalities and counties in Florida; occurrence of work strikes or stoppages and increasing personnel costs; NextEra Energy's ability to successfully identify, complete and integrate acquisitions, including the effect of increased competition for acquisitions; environmental, health and financial risks associated with NextEra Energy Resources' and FPL's ownership and operation of nuclear generation facilities; liability of NextEra Energy and FPL for significant retrospective assessments and/or retrospective insurance premiums in the event of an incident at certain nuclear generation facilities; increased operating and capital expenditures and/or reduced revenues at nuclear generation facilities of NextEra Energy or FPL resulting from orders or new regulations of the Nuclear Regulatory Commission; inability to operate any of NextEra Energy Resources' or FPL's owned nuclear generation units through the end of their respective operating licenses; effect of disruptions, uncertainty or volatility in the credit and capital markets or actions by third parties in connection with project-specific or other financing arrangements on NextEra Energy's and FPL's ability to fund their liquidity and capital needs and meet their growth objectives; inability of NextEra Energy, FPL and NextEra Energy Capital Holdings, Inc. to maintain their current credit ratings; impairment of NextEra Energy's and FPL's liquidity from inability of credit providers to fund their credit commitments or to maintain their current credit ratings; poor market performance and other economic factors that could affect NextEra Energy's defined benefit pension plan's funded status; poor market performance and other risks to the asset values of NextEra Energy's and FPL's nuclear decommissioning funds; changes in market value and other risks to certain of NextEra Energy's investments; effect of inability of NextEra Energy subsidiaries to pay upstream dividends or repay funds to NextEra Energy or of NextEra Energy's performance under guarantees of subsidiary obligations on NextEra Energy's ability to meet its financial obligations and to pay dividends on its common stock; the fact that the amount and timing of dividends payable on NextEra Energy's common stock, as well as the dividend policy approved by NextEra Energy's board of directors from time to time, and changes to that policy, are within the sole discretion of NextEra Energy's board of directors and, if declared and paid, dividends may be in amounts that are less than might be expected by shareholders; NEP's inability to access sources of capital on commercially reasonable terms could have an effect on its ability to consummate future acquisitions and on the value of NextEra Energy's limited partner interest in NextEra Energy Operating Partners, LP; effects of disruptions, uncertainty or volatility in the credit and capital markets on the market price of NextEra Energy's common stock; and the ultimate severity and duration of the coronavirus pandemic and its effects on NextEra Energy's or FPL's businesses. NextEra Energy and FPL discuss these and other risks and uncertainties in their annual report on Form 10-K for the year ended December 31, 2019 and other SEC filings, and this presentation should be read in conjunction with such SEC filings. The forward-looking statements made in this presentation are made only as of the date of this presentation and NextEra Energy and FPL undertake no obligation to update any forward-looking statements.

	Unidentified Future Assets	~\$900 ⁽⁵⁾	
	Total	\$2,000	Total \$2,000

The broad demand from private investors demonstrates NEP's continued access to attractive 3rd party financing alternatives

- 1) ~\$1.1 B funding for this portfolio is expected to be split into two draws to align with NEP financing needs
- 2) Net of expected tax equity proceeds, subject to working capital and other adjustments
- 3) Interests of the entity that owns Genesis Solar Energy Center to be included
- 4) Total expected revolver payoff is ~\$550 MM, balance funded by NEP's expected cash on hand
- 5) Non-binding letter of intent; subject to identifying projects(s) that are mutually acceptable and other conditions

NextEra Energy Partners Year-End CAFD Run-Rate Walk (\$MM)

1) Portfolio growth, which includes Wind Repowerings, Texas Pipeline expansion, and contract escalation

Convertible Equity Portfolio Financing Summary Terms

Key Terms	Summary
Funding Amount:	Kohlberg Kravis Roberts & Co (“KKR”) commitment of \$1,095.1 MM
Draw Timing:	Funds to be drawn in two separate closings, the first expected on or about December 18, 2020, the other by June 2021
Issuer:	Genesis Solar Holdings, LLC, an existing HoldCo operated and managed by affiliates of NEP
Units:	KKR to purchase Class B Units (non-controlling) from Issuer, pro rata with each closing amount; NEP to own 100% Class A Units (controlling) in Issuer
Cash Distributions:	<p>Cash distributions to occur on a monthly basis, 75% to Class A and 25% to Class B from the 2nd draw, subject to certain minimum buyout provisions as described below, which is expected to result in an implied coupon of 4.4% per annum. After year ten, Class B units will receive 80% of all distributions. If NEP has bought at least 20% of the Class B Units and KKR still holds Class B units after year ten, KKR will receive an additional allocation of 65% of cash otherwise allocated to NEP Member Class B units, up to a maximum of 30% of all cash available for distribution.</p> <p>Initial cash distribution allocations are subject to NEP having met a minimum buyout threshold of 20% of the Class B units by the six and a three quarter-year anniversary and 40% by the eight-year anniversary of the closing; cash distributions revert to original allocations if NEP subsequently achieves minimum buyout threshold.</p>
Buyout Right:	<p>Between the five- and ten-year anniversaries of the agreement, NEP will have the option to purchase Class B Units at NEP’s discretion, subject to certain restrictions as described below, for a purchase price equal to a fixed pre-tax annual return of 6.75% on each unit inclusive of all prior distributions (the “Buyout Amount”).</p> <p>NEP may pay the Buyout Amount by delivering non-voting NEP common units at an issuance price based on the lower of the then-current 10-day VWAP or market price of NEP common units (without discount). NEP will file a shelf registration agreement for the units issued in consideration for the Buyout Amount. The Buyout Right is subject to certain volumetric restrictions, including a minimum of 5% of the Class B units per buyout, and a maximum of 25% per calendar quarter and 50% per calendar year, provided however that NEP is limited to an aggregate maximum of 20% in year six, 40% in year seven, 60% in year eight, and 80% in year nine.</p>
Change of Control:	Upon a change of control event at NEP, KKR may elect to force a repurchase of the Class B Units for NEP common units at a Buyout Amount equal to the greater of A) a 7.75% fixed pre-tax annual return or B) 140% of KKR’s commitment if before year six, and 160% thereafter (inclusive of all prior distributions in both cases “A” and “B”). Upon a change of control of Investor, NEP may buy up to 100% of Class B Units at the Buyout Amount.
Transfer Provisions:	Prior to the sixth anniversary of the agreement, KKR can not transfer its Class B units without the consent of NEP; afterward, KKR may transfer without consent to anyone not defined as a competitor. NEP may not transfer its Class A units in the first 10 years without the consent of KKR.
Governance:	KKR will have limited governance rights. In the event that NEP has not purchased enough Class B units to claim 60% of all cash distributions by the tenth anniversary of the agreement, KKR will have the right to pursue a sale of the portfolio.

NEP's credit metrics remain on track

BB+ Range	Downgrade Threshold	Actual 2019 ⁽⁴⁾	Target YE 2020 ⁽⁴⁾
4.0x - 5.0x	>5.0x	4.3x	4.0x - 5.0x

- 1) Holdco Debt/EBITDA range and target are calculated on a calendar-year basis utilizing P-90 forecasts; debt includes holding company debt; EBITDA is comprised of project distributions net of fees related to the MSA, CSCS and other NEOP G&A expenses
- 2) Total Consolidated Debt/EBITDA and CFO Pre-WC/Debt ranges and targets are calculated on a calendar-year basis, utilizing P-90 forecasts; debt is total consolidated debt; EBITDA represents consolidated EBITDA adjusted for IDR fees and net PAYGO payments; CFO Pre-WC represents consolidated cash from operations before working capital adjusted for IDR fees and net PAYGO payments
- 3) Holdco Debt/FFO range and target are calculated on a run-rate basis, utilizing P-50 forecasts; debt is holding company debt; FFO is comprised of project distributions net of fees related to the MSA, CSCS and other NEOP G&A expenses
- 4) Calculations of the credit metric targets are based on NextEra Energy Partners' interpretation of the credit metric methodologies, which can be found on each agency's respective website; the rating ranges above can be found in the publications in which each agency initiated coverage on NextEra Energy Partners; assumes no acquisitions during 2020

Note: P-50 forecast represents the level of energy production that NEP estimates the portfolio will meet or exceed 50% of the time; P-90 forecast represents the level of energy production that NEP estimates the portfolio will meet or exceed 90% of the time

Expected Cash Available for Distribution⁽¹⁾ (December 31, 2020 Run Rate CAFD; \$ MM)

1) See Appendix for definition of Adjusted EBITDA and CAFD expectations; Project-Level Adjusted EBITDA represents Adjusted EBITDA before IDR Fees and Corporate Expenses

2) Debt service includes principal and interest payments on existing and projected third party debt, distributions net of contributions to/from tax equity investors, investors' expected share of distributable cash flow from convertible equity portfolio financings; excludes distributions to preferred equity investors

3) Pre-tax tax credits include investment tax credits, production tax credits earned by NEP, and production tax credits allocated to tax equity investors

75 4) Primarily reflects amortization of CITC

Expected Cash Available for Distribution⁽¹⁾ (December 31, 2021 Run Rate CAFD; \$ MM)

1) See Appendix for definition of Adjusted EBITDA and CAFD expectations; Project-Level Adjusted EBITDA represents Adjusted EBITDA before IDR Fees and Corporate Expenses

2) Debt service includes principal and interest payments on existing and projected third party debt, distributions net of contributions to/from tax equity investors, investors' expected share of distributable cash flow from convertible equity portfolio financings; excludes distributions to preferred equity investors

3) Pre-tax tax credits include investment tax credits, production tax credits earned by NEP, and production tax credits allocated to tax equity investors

76 4) Primarily reflects amortization of CITC

Definitional information

NextEra Energy Partners, LP. Adjusted EBITDA and CAFD Expectations

This presentation refers to adjusted EBITDA and CAFD expectations. NEP's adjusted EBITDA expectations represent projected (a) revenue less (b) fuel expense, less (c) project operating expenses, less (d) corporate G&A, plus (e) other income less (f) other deductions including IDR fees. Projected revenue as used in the calculations of projected EBITDA represents the sum of projected (a) operating revenues plus (b) a pre-tax allocation of production tax credits, plus (c) a pre-tax allocation of investment tax credits plus (d) earnings impact from convertible investment tax credits and plus (e) the reimbursement for lost revenue received pursuant to a contract with NextEra Energy Resources.

CAFD is defined as cash available for distribution and represents adjusted EBITDA less (1) a pre-tax allocation of production tax credits, less (2) a pre-tax allocation of investment tax credits, less (3) earnings impact from convertible investment tax credits, less (4) debt service, less (4) maintenance capital, less (5) income tax payments less, (6) other non-cash items included in adjusted EBITDA if any. CAFD excludes changes in working capital and distributions to preferred equity investors.

NextEra Energy Partners' adjusted EBITDA and CAFD run rate have not been reconciled to GAAP net income because NextEra Energy Partners' GAAP net income includes unrealized mark-to-market gains and losses related to derivative transactions, which cannot be determined at this time.

Cautionary Statement And Risk Factors That May Affect Future Results

This presentation contains “forward-looking statements” within the meaning of the federal securities laws. Forward-looking statements are not statements of historical facts, but instead represent the current expectations of NextEra Energy Partners, LP (together with its subsidiaries, NEP) regarding future operating results and other future events, many of which, by their nature, are inherently uncertain and outside of NEP’s control. Forward-looking statements in this presentation include, among others, statements concerning adjusted EBITDA, cash available for distributions (CAFD) and unit distribution expectations, as well as statements concerning NEP’s future operating performance and financing needs. In some cases, you can identify the forward-looking statements by words or phrases such as “will,” “may result,” “expect,” “anticipate,” “believe,” “intend,” “plan,” “seek,” “aim,” “potential,” “projection,” “forecast,” “predict,” “goals,” “target,” “outlook,” “should,” “would” or similar words or expressions. You should not place undue reliance on these forward-looking statements, which are not a guarantee of future performance. The future results of NEP and its business and financial condition are subject to risks and uncertainties that could cause NEP’s actual results to differ materially from those expressed or implied in the forward-looking statements. These risks and uncertainties could require NEP to limit or eliminate certain operations. These risks and uncertainties include, but are not limited to, the following: NEP’s ability to make cash distributions to its unitholders is affected by wind and solar conditions at its renewable energy projects; NEP’s business, financial condition, results of operations and prospects can be materially adversely affected by weather conditions, including, but not limited to, the impact of severe weather; Operation and maintenance of renewable energy projects involve significant risks that could result in unplanned power outages, reduced output, personal injury or loss of life; Natural gas gathering and transmission activities involve numerous risks that may result in accidents or otherwise affect NEP’s pipeline operations; NEP depends on certain of the renewable energy projects and pipelines in its portfolio for a substantial portion of its anticipated cash flows; NEP is pursuing the expansion of natural gas pipelines and the repowering of wind projects that will require up-front capital expenditures and expose NEP to project development risks; Terrorist acts, cyberattacks or other similar events could impact NEP’s projects, pipelines or surrounding areas and adversely affect its business; The ability of NEP to obtain insurance and the terms of any available insurance coverage could be materially adversely affected by international, national, state or local events and company-specific events, as well as the financial condition of insurers. NEP’s insurance coverage does not insure against all potential risks and it may become subject to higher insurance premiums; Warranties provided by the suppliers of equipment for NEP’s projects may be limited by the ability of a supplier to satisfy its warranty obligations, or by the terms of the warranty, so the warranties may be insufficient to compensate NEP for its losses; Supplier concentration at certain of NEP’s projects may expose it to significant credit or performance risks; NEP relies on interconnection, transmission and other pipeline facilities of third parties to deliver energy from its renewable energy projects and to transport natural gas to and from its pipelines. If these facilities become unavailable, NEP’s projects and pipelines may not be able to operate or deliver energy or may become partially or fully unavailable to transport natural gas; NEP’s business is subject to liabilities and operating restrictions arising from environmental, health and safety laws and regulations, compliance with which may require significant capital expenditures, increase NEP’s cost of operations and affect or limit its business plans; NEP’s renewable energy projects or pipelines may be adversely affected by legislative changes or a failure to comply with applicable energy and pipeline regulations; Petroleos Mexicanos (Pemex) may claim certain immunities under the Foreign Sovereign Immunities Act and Mexican law, and the Texas pipeline entities’ ability to sue or recover from Pemex for breach of contract may be limited and may be exacerbated if there is a deterioration in the economic relationship between the U.S. and Mexico; NEP does not own all of the land on which the projects in its portfolio are located and its use and enjoyment of the property may be adversely affected to the extent that there are any lienholders or land rights holders that have rights that are superior to NEP’s rights or the U.S. Bureau of Land Management suspends its federal rights-of-way grants; NEP is subject to risks associated with litigation or administrative proceedings that could materially impact its operations, including, but not limited to, proceedings related to projects it acquires in the future; NEP’s cross-border operations require NEP to comply with anti-corruption laws and regulations of the U.S. government and Mexico; NEP is subject to risks associated with its ownership or acquisition of projects or pipelines that are under construction, which could result in its inability to complete construction projects on time or at all, and make projects too expensive to complete or cause the return on an investment to be less than expected; NEP relies on a limited number of customers and is exposed to the risk that they may be unwilling or unable to fulfill their contractual obligations to NEP or that they otherwise terminate their agreements with NEP;

Cautionary Statement And Risk Factors That May Affect Future Results (cont.)

NEP may not be able to extend, renew or replace expiring or terminated power purchase agreements (PPA), natural gas transportation agreements or other customer contracts at favorable rates or on a long-term basis; If the energy production by or availability of NEP's renewable energy projects is less than expected, they may not be able to satisfy minimum production or availability obligations under their PPAs; NEP's growth strategy depends on locating and acquiring interests in additional projects consistent with its business strategy at favorable prices; Lower prices for other fuel sources may reduce the demand for wind and solar energy; Reductions in demand for natural gas in the United States or Mexico and low market prices of natural gas could materially adversely affect NEP's pipeline operations and cash flows; Government laws, regulations and policies providing incentives and subsidies for clean energy could be changed, reduced or eliminated at any time and such changes may negatively impact NEP's growth strategy; NEP's growth strategy depends on the acquisition of projects developed by NextEra Energy, Inc. (NEE) and third parties, which face risks related to project siting, financing, construction, permitting, the environment, governmental approvals and the negotiation of project development agreements; Acquisitions of existing clean energy projects involve numerous risks; Renewable energy procurement is subject to U.S. state regulations, with relatively irregular, infrequent and often competitive procurement windows; NEP may continue to acquire other sources of clean energy and may expand to include other types of assets. Any further acquisition of non-renewable energy projects may present unforeseen challenges and result in a competitive disadvantage relative to NEP's more-established competitors; NEP faces substantial competition primarily from regulated utilities, developers, independent power producers, pension funds and private equity funds for opportunities in North America; The natural gas pipeline industry is highly competitive, and increased competitive pressure could adversely affect NEP's business; NEP may not be able to access sources of capital on commercially reasonable terms, which would have a material adverse effect on its ability to consummate future acquisitions; Restrictions in NEP and its subsidiaries' financing agreements could adversely affect NEP's business, financial condition, results of operations and ability to make cash distributions to its unitholders; NEP's cash distributions to its unitholders may be reduced as a result of restrictions on NEP's subsidiaries' cash distributions to NEP under the terms of their indebtedness or other financing agreements; NEP's subsidiaries' substantial amount of indebtedness may adversely affect NEP's ability to operate its business, and its failure to comply with the terms of its subsidiaries' indebtedness could have a material adverse effect on NEP's financial condition; NEP is exposed to risks inherent in its use of interest rate swaps; NEE has influence over NEP; Under the cash sweep and credit support agreement, NEP receives credit support from NEE and its affiliates. NEP's subsidiaries may default under contracts or become subject to cash sweeps if credit support is terminated, if NEE or its affiliates fail to honor their obligations under credit support arrangements, or if NEE or another credit support provider ceases to satisfy creditworthiness requirements, and NEP will be required in certain circumstances to reimburse NEE for draws that are made on credit support; NextEra Energy Resources, LLC (NEER) or one of its affiliates is permitted to borrow funds received by NEP's subsidiaries and is obligated to return these funds only as needed to cover project costs and distributions or as demanded by NextEra Energy Operating Partners' (NEP OpCo). NEP's financial condition and ability to make distributions to its unitholders, as well as its ability to grow distributions in the future, is highly dependent on NEER's performance of its obligations to return all or a portion of these funds; NEP may not be able to consummate future acquisitions; NEER's right of first refusal may adversely affect NEP's ability to consummate future sales or to obtain favorable sale terms; NextEra Energy Partners GP, Inc. (NEP GP) and its affiliates may have conflicts of interest with NEP and have limited duties to NEP and its unitholders; NEP GP and its affiliates and the directors and officers of NEP are not restricted in their ability to compete with NEP, whose business is subject to certain restrictions; NEP may only terminate the Management Services Agreement among, NEP, NextEra Energy Management Partners, LP (NEE Management), NEP OpCo and NextEra Energy Operating Partners GP, LLC (NEP OpCo GP) under certain specified conditions; If the agreements with NEE Management or NEER are terminated, NEP may be unable to contract with a substitute service provider on similar terms; NEP's arrangements with NEE limit NEE's potential liability, and NEP has agreed to indemnify NEE against claims that it may face in connection with such arrangements, which may lead NEE to assume greater risks when making decisions relating to NEP than it otherwise would if acting solely for its own account;

Cautionary Statement And Risk Factors That May Affect Future Results (cont.)

NEP's ability to make distributions to its unitholders depends on the ability of NEP OpCo to make cash distributions to its limited partners; If NEP incurs material tax liabilities, NEP's distributions to its unitholders may be reduced, without any corresponding reduction in the amount of the IDR fee; Holders of NEP's units may be subject to voting restrictions; NEP's partnership agreement replaces the fiduciary duties that NEP GP and NEP's directors and officers might have to holders of its common units with contractual standards governing their duties; NEP's partnership agreement restricts the remedies available to holders of NEP's common units for actions taken by NEP's directors or NEP GP that might otherwise constitute breaches of fiduciary duties; Certain of NEP's actions require the consent of NEP GP; Holders of NEP's common units and preferred units currently cannot remove NEP GP without NEE's consent; NEE's interest in NEP GP and the control of NEP GP may be transferred to a third party without unitholder consent; The IDR fee may be assigned to a third party without unitholder consent; NEP may issue additional units without unitholder approval, which would dilute unitholder interests; Reimbursements and fees owed to NEP GP and its affiliates for services provided to NEP or on NEP's behalf will reduce cash distributions from NEP OpCo and from NEP to NEP's unitholders, and there are no limits on the amount that NEP OpCo may be required to pay; Discretion in establishing cash reserves by NEP OpCo GP may reduce the amount of cash distributions to unitholders; NEP OpCo can borrow money to pay distributions, which would reduce the amount of credit available to operate NEP's business; Increases in interest rates could adversely impact the price of NEP's common units, NEP's ability to issue equity or incur debt for acquisitions or other purposes and NEP's ability to make cash distributions to its unitholders; The liability of holders of NEP's units, which represent limited partnership interests in NEP, may not be limited if a court finds that unitholder action constitutes control of NEP's business; Unitholders may have liability to repay distributions that were wrongfully distributed to them; Provisions in NEP's partnership agreement may discourage or delay an acquisition of NEP that NEP unitholders may consider favorable, which could decrease the value of NEP's common units, and could make it more difficult for NEP unitholders to change the board of directors; The New York Stock Exchange does not require a publicly traded limited partnership like NEP to comply with certain of its corporate governance requirements; The issuance of preferred units or other securities convertible into common units may affect the market price for NEP's common units, will dilute common unitholders' ownership in NEP and may decrease the amount of cash available for distribution for each common unit; The preferred units have rights, preferences and privileges that are not held by, and will be preferential to the rights of, holders of the common units; NEP's future tax liability may be greater than expected if NEP does not generate net operating losses (NOLs) sufficient to offset taxable income or if tax authorities challenge certain of NEP's tax positions; NEP's ability to use NOLs to offset future income may be limited; NEP will not have complete control over NEP's tax decisions; A valuation allowance may be required for NEP's deferred tax assets; Distributions to unitholders may be taxable as dividends; and, the coronavirus pandemic may have a material adverse impact on NEP's business' financial condition, liquidity, results of operations and ability to make cash distributions to its unitholders. NEP discusses these and other risks and uncertainties in its annual report on Form 10-K for the year ended December 31, 2019 and other SEC filings, and this presentation should be read in conjunction with such SEC filings made through the date of this presentation. The forward-looking statements made in this presentation are made only as of the date of this presentation and NEP undertakes no obligation to update any forward-looking statements.
