

NextEra Energy, Inc and its Subsidiaries (collectively NEE) Code of Conduct For Persons Engaged in Natural Gas Sale for Resale Transactions and Voluntarily Submitting Natural Gas Pricing Data To Bona Fide Publications

NEE adopts the following Code of Conduct for persons engaged on NEE's behalf or on behalf of any of NEE's affiliates or subsidiaries in natural gas sale for resale transactions and for voluntarily submitting energy pricing data to appropriate trade publications.

NEE does not share energy pricing data with market participants and does not permit its employees to share energy pricing data with market participants. NEE employees may provide energy pricing data to bona fide energy trade publications only in compliance with this Code of Conduct.

NEE's decision to submit energy pricing data to bona fide energy publications is completely voluntary. NEE reserves the right to decline to provide, or cease to provide, energy pricing data to a publication in NEE's complete discretion, without reservation, barring further changes in law or regulation. NEE will only provide data to those bona fide energy publications that have agreed to comply with the price index developer guidance found in the U.S. Federal Energy Regulatory Commission ("FERC") Policy Statement on Natural Gas and Electric Price Indices.

Code of Conduct For Persons Engaged in Natural Gas Sale for Resale Transactions As Prescribed by 18 CFR §284.403

NEE's subsidiaries hold blanket certificates from the Federal Energy Regulatory Commission ("FERC") authorizing them to engage in natural gas sales for resale in the United States. These blanket certificates are not applicable to transactions involving the so-called "first sale" of natural gas. NEE's sale for resale transactions must conform to the following principles:

To the extent that NEE engages in reporting of transactions to publishers of natural gas indices, persons responsible for reporting shall comply with this Code of Conduct, as well as any applicable FERC policies and rules promulgated by the publisher pertaining to price reporting, shall provide accurate and factual information, and shall not knowingly submit false or misleading information or omit material information to any such publisher. As a holder of a blanket marketing certificate, NEE is required to retain, for a period of five (5) years, all data and information upon which it billed prices charged for natural gas sales for resale transactions, as well as all prices reported for use in price indices.

Code of Conduct For Voluntarily Submitting Natural Gas Pricing Data To Bona Fide Publications

1. NEE (the NEE designation includes all affiliates and subsidiaries that voluntarily submit energy pricing data to appropriate trade publications) will submit only raw data on a transaction-by-transaction basis. No mathematical calculations will be performed and included as data by NEE. NEE's reports will include: (a) price; (b) volume; (c) buy/sell indicator; (d) delivery/receipt location; (e) transaction date; (f) term; and (g) deal number.
2. NEE will submit data on all applicable transactions it completes unless existing contract agreements prevent it from doing so.
3. NEE will submit a complete set of data that includes all applicable transactions with data elements or fields for the particular index. (Where there is no published index, NEE will supply the relevant data with an identified pipeline and meter.) The data will be submitted at a transactional level as frequently as stipulated for the index. Quantities will be presented in standard units. Commodity specification will be reasonably consistent with those of the index publisher.
4. To the extent NEE submits monthly base load data to bona fide publications, the data will include only those physical fixed price deals for the prompt month and physical basis deals transacted during bid week and prior to NYMEX close. Prices reported will exclude financial transactions, exchanges for physicals ("EFP"), trigger deals unless transacted and triggered during bid week and any deals referencing an index.
5. Daily pricing submitted to bona fide publications will be the actual prices transacted for fixed price physical transactions for next day's (or weekend) business and will not include intraday business.
6. NEE will include transactions executed on electronic trading platforms and over the-counter clearinghouses.
7. NEE will not report intra-company transactions, transactions executed with affiliate companies or trading desks within the corporation.
8. NEE will not report structured transactions or negotiated transactions that are composed of a combination of standard products such as forwards, futures, and options.
9. Employees charged with the responsibility for reporting data to index developers shall be independent from and not responsible for NEE's energy trading activities. As such, only NEE's Trading Risk Management personnel are authorized to report trade data to an index developer. Front office and other NEE personnel responsible for trading are prohibited from reporting any prices to an index developer. The prices reported to index developers

are the same as those recorded in the company's systems at the time of submission of the trade data to the index developer.

10. NEE will make reasonable efforts to review the transaction data prior to submission, to be reasonably available for queries prior to publication, to notify the publication of errors as consistent with the materiality standard defined by the publication, and to challenge a published index only when such challenges are warranted. Errors in reported data shall be corrected by NEE's Trading Risk Management group as soon as practicable through the index developer's established error resolution process.
11. NEE will make reasonable efforts to submit data electronically, but submission via facsimile will occur when otherwise unavoidable.
12. NEE will maintain records of the transactions submitted for audit purposes and have an external or internal independent auditor review the implementation of and adherence to the data gathering and submission process adopted by the Company at least once every two years.
13. NEE will comply with NEE's internal record retention policy and shall retain for a period of five (5) years all data and information upon which it billed the prices charged for natural gas sales for resale or the prices reported to price indices.
14. NEE will implement procedures to protect against data release or misuse and will review the data protection policies of publications when deciding whether or not to voluntarily provide, or continue to provide, energy pricing data to bona fide trade publications.
15. NEE will provide this Code of Conduct to its employees and NEE will make this Code of Conduct available to the public on its website. NEE is prepared to appropriately discipline employees for willful noncompliance with this Code of Conduct.
