			<b>SYSTEM TOTAL (firm and non-firm capacity) as of September 30, 2021</b>
			<b>29,084</b>
Battery Storage	Babcock	1	10.0 <sup>(5)</sup>
Battery Storage	Citrus	1	4.0 <sup>(5)</sup>
			<b>14.0</b>

(1) Represents FPL's net ownership interest in warm weather peaking capability

(2) The megawatts generated by the 75 MW solar thermal hybrid facility replace steam produced by this unit and therefore are not incremental

(3) Excludes Orlando Utilities Commission's and the Florida Municipal Power Agency's combined share of approximately 15% of St. Lucie Unit No. 2

(4) Represents FPL's approximately 76% ownership of Scherer Unit No. 4, which is jointly owned by JEA

(5) These battery storage facilities are coupled with a universal solar site. They increase the System Total (Firm Capacity) for warm weather peaking capability, but they do not increase the System Total (Firm and Non-Firm Capacity).

(1) DMI: Differential Membership Interest; for wind, DMI is PAYGO; for solar DMI is traditional solar ITC tax equity structure

(2) NEP owns a 50% non-economic equity method investment in these solar projects

(3) These generating facilities are part of the NEP portfolio and at 9/30/2021 subject to an approximately 43% noncontrolling interest; excludes equity method investments in McCoy and Adelanto as noted in FN 2
