

# Cautionary Statements And Risk Factors That May Affect Future Results

Any statements made herein about future operating and/or financial results and/or other future events are forward-looking statements under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements may include, for example, statements regarding anticipated future financial and operating performance and results, including estimates for growth. Actual results may differ materially from such forward-looking statements. A discussion of factors that could cause actual results or events to vary is contained in the supporting material titled Risk Factors and Reconciliations posted to the Investor section of NextEra Energy website and in our Securities and Exchange Commission (SEC) filings.

## Non-GAAP Financial Information

This presentation refers to adjusted earnings, which are not financial measurements prepared in accordance with GAAP. Adjusted earnings, as defined by NextEra Energy, represent net income before the mark-to-market effects of non-qualifying hedges, the net effect of other than temporary impairments (OTTI) on certain investments, and other adjustments, including the after-tax charges resulting from the sale of the five natural gas-fired generating assets in two sale transactions in 2011. Quantitative reconciliations of historical adjusted earnings to net income, which is the most comparable GAAP measure to adjusted earnings, are included in the supporting material titled Risk Factors and Reconciliations posted to the Investor section of NextEra Energy's website. Prospective adjusted earnings amounts cannot be reconciled to net income because net income includes the mark-to-market effects of non-qualifying hedges and OTTI on certain investments, neither of which can be determined at this time. Adjusted earnings does not represent a substitute for net income, as prepared in accordance with GAAP.
