Definitional information

NextEra Energy Partners, LP. Adjusted EBITDA and CAFD Expectations

This presentation refers to adjusted EBITDA and CAFD expectations. NEP's adjusted EBITDA expectations represent projected revenue less fuel expense, project operating expenses, a portion of corporate G&A associated with these projects, plus other income, less other deductions. Projected revenue as used in the calculations of projected EBITDA represents the sum of projected operating revenue plus the earnings impact from the amortization of convertible investment tax credits.

CAFD is defined as cash available for distribution and represents adjusted EBITDA less (1) a pre-tax allocation of production tax credits, less (2) a pre-tax allocation of the earnings impact from convertible investment tax credits, less (3) debt service, less (4) maintenance capital, less (5) income tax payments, less (6) other non-cash items included in adjusted EBITDA if any. CAFD excludes changes in working capital.

NextEra Energy Partners' expectations of 2015 and 2016 adjusted EBITDA and CAFD reflect the consummation of forecasted acquisitions. These measures have not been reconciled to GAAP net income because NextEra Energy Partners did not prepare estimates of the effect of these acquisitions on certain GAAP line items that would be necessary to provide a forward-looking estimate of GAAP net income for 2015 and 2016, and the information necessary to provide such a forward-looking estimate is not available without unreasonable effort.
